

Repairing a Flat Tire

If you have a flat tire, use the plug method to make a temporary repair. (The plug method is applied from the outside of the tire and is the same as that for conventional tubeless tires.)

A plug-type repair kit, available at most auto parts stores or service stations, provides a plug, an installation tool, tire cement, and an instruction sheet. Follow the instructions provided with the repair kit to make a temporary repair.

As soon as possible, have the tire permanently repaired by an authorized Honda dealer. Any tire that cannot be repaired should be replaced.

Whenever the TRX300FW is to be operated far from service facilities or available transportation, we recommend that you carry a tire pump and a repair kit with the vehicle.
