

## OIL RECOMMENDATION

Use only high detergent, premium quality motor oil certified to meet or exceed U.S. car manufacturer's requirements for Service SE. Motor oils intended for Service SE will show this designation on the container. Oil should be changed at intervals prescribed in the Maintenance Schedule on pages 21 and 22.

### NOTES :

- **Engine oil is a major factor affecting the performance and service life of the engine. Non-detergent and low quality oils are specifically not recommended.**
- **The regular use of special oil additives is unnecessary and will only increase operating expenses.**

## VISCOSITY

Viscosity selection should be based upon the average atmospheric temperature in your riding area. Change to the proper viscosity oil when the atmospheric temperature changes substantially.

Recommended viscosity:

In all seasons                      SAE 10W-40

Alternate:

Above 15°C (59°F)	SAE 30
0°~15°C (32~59°F)	SAE 20 or 20W
Below 0°C (32°F)	SAE 10W
