Storing Your Honda

- With the engine stop switch in the RUN position, press the start button several times to crank the engine and distribute the oil.
- Reinstall the spark plug and spark plug cap.
- 6. Remove the battery and charge it fully. Store it in an area protected from freezing temperatures and direct sunlight. Slow charge the battery (page 129) once a month.
- Wash and dry your scooter. Wax all painted surfaces. Apply rustinhibiting oil to the chrome pieces.
- 8. Inflate the tires to their recommended pressures (page 119).

- Store your scooter in an unheated area, free of dampness, away from sunlight, with a minimum of daily temperature variation.
- 10. Place your scooter on blocks to lift both tires off the floor.
- 11. Cover your scooter with a porous material. Avoid using plastic or similar non-breathing, coated materials that restrict air flow and allow heat and moisture to accumulate.
