

STARTING THE ENGINE

Always follow the proper starting procedure described below.

Your motorcycle's exhaust contains poisonous carbon monoxide gas. High levels of carbon monoxide can collect rapidly in enclosed areas such as a garage. Do not run the engine with the garage door closed. Even with the door open, run the engine only long enough to move your motorcycle out of the garage.

Preparation

Before starting, insert the key and turn the ignition switch ON.

Make sure that the transmission is in neutral. Turn the engine stop switch to RUN and the fuel valve ON.
