

### **Exhaust Emission Control System**

The exhaust emission control system consists of appropriate carburetor settings, and no adjustment should be made except idle speed adjustment with the throttle stop screw.

### **Secondary Air Injection System**

The secondary air injection system adds filtered air into the exhaust gas to help improve emission control performance.

### **Catalytic Converter**

The exhaust system contains one or more catalytic converters. Catalytic converters use a catalyst to convert most of the harmful exhaust gas compounds into harmless compounds.
