4. Press the MODE button. The minute display will start flashing.

5. To set the minute, press the RESET button until the desired minute. The minute display will return to "00" when "60" is reached without affecting the hour display.
   • The time is advanced by one minute, each time the button is pushed.
   • Quick setting — press and hold the RESET button until the desired minute appears.

6. To end the adjustment, press the MODE button or turn the ignition switch OFF.
