Load Limits & Guidelines

Load Limits

Following are the load limits for your ATV:

There are limits to how much weight can be carried on your ATV and be pulled in a trailer.

The following load limits apply to standard equipment only. Modifying your ATV, using non-standard equipment, or riding on terrain that is not flat and smooth could further reduce these limits.

maximum weight capacity (includes the weight of the rider, all cargo, and accessories.)	485 lbs (220 kg) maximum
front cargo rack weight limit	= 66 lbs (30 kg) maximum
rear cargo rack weight limit	= 133 lbs (60 kg) maximum
tow weight limit (Combined weight of the trailer and all cargo in the trailer)	= 850 lbs (385 kgf) (3776 N) maximum
tongue weight (Weight on the trailer tongue)	= 30 lbs (14 kgf) (137 N) recommended
tongue and rear cargo weight (Combined weight on the trailer tongue and on the rear cargo rack)	= 133 lbs (60 kg) maximum

Tongue weight can be measured with an ordinary bathroom scale. Place the scale under the tongue, using either a tongue jack or other support to keep the trailer level.

The weight of added accessories will reduce the maximum cargo weight you can carry.
