

# Riding Your ATV

---

What to do after the ATV has stalled or rolled backwards:

If the hill is too steep or too slippery, or if you have any doubt whether you can safely walk the ATV back down the hill, leave the vehicle where it is and get help. If possible, block the wheels so the vehicle doesn't roll backwards.

If the hill is not too steep and you have good footing, you may be able to walk the ATV back down the hill. Make sure your intended path is clear in case you lose control of the ATV.

Be sure your legs are clear of the wheels.

Body position for backing down a hill.

1. Stand with your body facing downhill, beside the vehicle so you can reach the front brake lever with your left hand.
2. Be sure your legs are clear of the wheels.  
Check your footing.
3. Slowly and carefully back the ATV down the hill using the front brake lever to control speed.
4. If you lose control of the ATV, for your safety, get away from the vehicle.
