RIDING IN REVERSE

To shift into reverse, first bring the vehicle to a complete stop and make sure the transmission is in neutral. Then follow these procedures:

- 1. Be sure there are no obstacles or people in the way.
- 2. While pushing the reverse selector knob in, squeeze the rear brake lever, then depress the gearshift pedal (page 29).
- 3. Release the rear brake lever.
- 4. Open the throttle gradually and ride slowly. Do not open the throttle suddenly or make abrupt turns.
- 5. To stop, close the throttle and gradually apply both the front and rear brakes. Do not abruptly apply the rear brake by itself.
- To shift out of reverse and into neutral, raise the gearshift pedal one stroke.

While reading this manual, remember:

∆WARNING

Indicates a strong possibility that serious injury or death may result if instructions are not followed.
