

## LOADING AND ACCESSORIES

### **▲ WARNING**

**\* A motorcycle is sensitive to changes in weight distribution. Addition of accessories or cargo can impair the motorcycle's stability and performance. To prevent an accident, use extreme care when adding and riding with cargo and accessories. These general guidelines may help you decide whether, or how to equip your motorcycle.**

### **Loading**

The combined weight of the rider, cargo, and all accessories must not exceed the maximum weight capacity:

100 kg (220 lbs)

1. Keep cargo and accessory weight low and close to the center of the motorcycle. Load weight equally on both sides to minimize imbalance. As weight is located further from the motorcycle's center of gravity, handling is proportionally affected.
2. All cargo and accessories must be secure for stable handling. Recheck cargo security and accessory mounts frequently.
3. Do not attach large or heavy items (such as a sleeping bag or tent) to the handlebars, fork, or fender. Unstable handling or slow steering response may result.
