

**CBR500RA only**

When removing and installing the wheel, be careful not to damage the wheel speed sensor and pulser ring.

## Front Wheel

### Removal

1. Place your motorcycle on a firm, level surface.
2. Cover the right side of the front wheel and brake caliper with protective tape or cloth.
3. On the right side, remove the mounting bolts.
  - Support the brake caliper assembly so that it doesn't hang from the brake hose. Do not twist the brake hose.
  - Avoid getting grease, oil, or dirt on the disc or pad surfaces.
  - Do not pull the front brake lever while the brake caliper is removed.

- Take care to prevent the brake caliper from scratching the wheel during removal.
