1. Using the start button

With the throttle completely closed, press the start button.

Using the kickstarter

Lightly depress the kickstarter until resistance is felt.

Then let the kickstarter return to the top of its stroke.

With the throttle completely closed, operate the kickstarter starting from the top of the stroke, kick through to the bottom with a rapid, continuous motion.

NOTICE

Allowing the kickstarter to snap back freely against the pedal stop can damage the engine case.

2. If you cannot start the engine, open the throttle slightly (about 0.1 in (3 mm), without freeplay).
