Competitive riding can be tough on a motorcycle, so it's important to inspect your CRF and correct any problems you find before each ride. Check the following items (page numbers are at the right):

A WARNING

Improperly maintaining this motorcycle or failing to correct a problem before riding can cause a crash in which you can be seriously hurt or killed.

Always perform a pre-ride inspection before every ride and correct any problems.

Pre-ride Inspection

Check the following before each ride:
• Engine oil level
• Transmission oil level
• Fuel line for condition
• Coolant for proper level
• Cooling system and hoses for condition 42
 Spark plug for proper heat range, carbon
fouling and spark plug wire terminal for
looseness
 Air cleaner for condition and
contamination
• Clutch lever adjustment and freeplay 49
• Hot start lever freeplay 51
• Breather drain for cleaning
 Steering head bearing and related parts
for condition
• Carburetor throttle operation 46
 Tires for damage or improper inflation
pressure 80
• Spokes for looseness
• Rim locks for looseness
 Front and rear suspension for proper
operation 70,71
• Front and rear brakes, check operation 75
 Drive chain for correct slack and adequate
lubrication 82
