## Indicator

## **Circuit Inspection**

Always clean around the ECM and keep debris away from the connectors before disconnecting them.

A faulty PGM-FI system is often related to poorly connected or corroded connections. Check the following connections.

(1) MAP sensor connector
(2) ECT sensor connector
(3) TP sensor connector
(4) IAT sensor connector
(5) Injector connector
(6) No.1/No.2 CKP sensor connector
(7) ECM connector

Remember, circuit inspection is not a "cure-all" for other problems in your engine's PGM-FI system.
