

Audio Systems

(Models equipped with Navigation System)

Press the DISP button to toggle between the Multi Information Display (time, audio, odo and trip), a Navi full screen map with the time, and a split screen with the Multi information condensed in a bar below the map.

If you are not in the Navigation System when you turn the ignition switch OFF, you will see the audio display when you turn the ignition switch ON again. If you were in the system, you will see the system disclaimer with ENT highlighted.
