

Audio Systems

SRS

SRS CS Auto™ creates a surround sound experience on the motorcycle and provides rich bass and an elevated audio image.

SRS Headphone™ creates a realistic and immersive 3D stereo headphone listening experience.

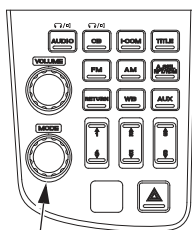

SRS^{CS Auto} and SRS^{Headphone} are trademarks of SRS Labs, Inc.

CS Auto and Headphone technologies are incorporated under license from SRS Labs, Inc.

- To use the circuit — push the MODE knob/button until “SRS CS Auto” is displayed (page 97). To select the SRS of headset, push the MODE knob/button until “SRS HP” is displayed. Then, within 5 seconds, change the SRS setting.
- To change the setting — turn the MODE knob/button.
SRS CS Auto has three settings – HI (High), LOW (Low), OFF (Off).
SRS HP has two settings – ON (On), OFF (Off).
