

Instruments *(Continued)*

- Return to the previous screen or the Home screen.  P.24

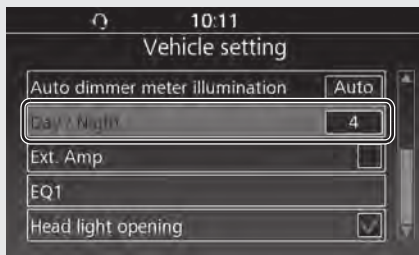

Setting range: Level 1 to 8 or [AUTO]
Default: [AUTO]

The display can become dark when the display is very hot. If it does not restore the original brightness, contact your dealer.

Automatic Brightness Control:  P.214

Day / Night

You can adjust the settings for daytime mode and nighttime mode of the navigation map or applications such as Maps (Apple CarPlay).

Changing of Setting Value

When the setting of [Auto dimmer meter illumination] is [Auto]:

If you set to a higher value, the screen will switch to nighttime mode at brighter ambient lighting conditions.

If you set to a lower value, the screen will switch to nighttime mode at darker ambient lighting conditions.

When the setting of [Auto dimmer meter illumination] is not [Auto]:

When the setting value of [Day / Night] is higher than the setting value of [Auto dimmer meter illumination], the screen will switch to nighttime mode.

For example, when the setting value of [Auto dimmer meter illumination] is 5, the screen will switch to nighttime mode if [Day / Night] is set to 6 or higher.

Auto Dimmer Meter Illumination:

 P.31

Holding the Mode

When [Hold day mode] is selected, the screen is always displayed in daytime mode.

When [Hold night mode] is selected, the screen is always displayed in nighttime mode.
