

# Loads

- Transporting extra weight affects the handling, braking and stability of the motorcycle. Always ride at a safe speed in terms of the load you are transporting.
- Avoid transporting excessive weight and always remain within the weight limits.
- **2 Maximum weight / Maximum luggage capacity** P. 104
- Fasten luggage securely, so that it is balanced and near the centre of the motorcycle.
- Do not place objects near the lights or silencer.
- Never transport a passenger.
- Keep the load small and light when riding. Make sure that the luggage does not brush against other objects or interfere with your movements when changing position to maintain balance and stability.

- It is totally prohibited to transport cargo on the rear fender. The motorcycle has not been designed for this purpose.

## 2 WARNING

Excessive or incorrect loads may cause an accident in which you may be seriously hurt or even killed.

Follow all load limits and other guidelines included in this manual.
