

# Maintenance schedule

The Maintenance schedule specifies the necessary maintenance requirements to ensure safe, reliable performance, as well as proper emissions control.

Maintenance work must be performed in accordance with the standards and specifications of Montesa by properly trained and qualified technicians.

Your Montesa dealer meets all of these requirements. Keep a maintenance record to ensure that the motorcycle receives proper maintenance. Make sure whoever performs the maintenance completes this record.

Any scheduled maintenance is considered to be a normal operating cost for the owner, who will be charged for it by the dealer.

Save all receipts.

If you sell your motorcycle, these receipts must be provided to the new owner, together with the motorcycle.

Montesa recommends that your dealer should road test your motorcycle after each periodic maintenance is carried out.
