

Safety guidelines

To ensure your safety, follow these guidelines:

- Carry out all the normal, customary inspections specified in this manual.
- Turn off the engine and keep sparks and flames away from the motorcycle before filling the fuel tank.
- Do not run the engine in an enclosed or semi-enclosed space. The carbon dioxide present in the exhaust is toxic and can kill you.

Always wear a helmet when riding

It's a fact: helmets and protective gear significantly reduce the number and severity of injuries to the head and other areas of the body. So always wear an approved motorcycle helmet and protective equipment. ➔ P. 10

Before riding

Make sure that you are physically and mentally capable, and that you have not consumed alcohol or drugs. Check that you are using a duly approved motorcycle helmet and protective gear.

NOTICE This motorcycle is not designed to transport a passenger.

Take the time you need to learn and practise

Even if you have operated other motorcycles, practise riding in a safe area to familiarise yourself with the operation and handling of this motorcycle and get used to its weight and size.

Always remain alert

Pay attention to other vehicles around you at all times and do not assume that other drivers have detected your presence. Be ready to stop suddenly or take evasive action.
