

Driver Controls

Steering Wheel Adjustment Lever (except for SXS1000M3)

Your Honda SXS is equipped with an height-adjustable steering wheel. Adjust the steering wheel position so that you can comfortably grip the steering wheel in an appropriate driving posture.

NOTICE

Do not adjust the steering wheel position while driving. Adjusting while driving will move the steering wheel position and may cause you to lose control of the vehicle. Make sure to adjust the steering wheel only when the vehicle is stopped.

NOTICE

The steering wheel position damper unit contains high pressure nitrogen gas. Do not attempt to disassemble, service, or improperly dispose of the damper. See your dealer.
