

Loading Cargo

Your vehicle was designed to carry cargo. However, carrying a load that is too heavy or improperly loaded can adversely affect your vehicle's handling, stability, and stopping distance and make it unsafe. Before carrying any type of cargo, be sure to read the following pages.

Load Limit

See page 105 for guidelines on driving with cargo.

Maximum weight capacity = 1,164 lb (528 kg)

This includes the weight of cargo, occupants and accessories.

Maximum cargo weight = 299 lb (136 kg)

This includes all items in the cargo bed and any accessories.

3 WARNING

Overloading the cargo bed or failing to secure cargo properly can cause a crash in which you or others could be seriously hurt or killed.

Follow the cargo limits and loading guidelines in this owner's manual.
