

Driving Guidelines

Driving with Cargo

The added weight of carrying cargo will affect how your vehicle accelerates, brakes, and handles.

Please follow these guidelines whenever you carry cargo:

- Do not exceed the cargo limit (page 82).
- When driving with heavy cargo, shift the shift select lever into low-range (L) position.
- Keep speed low, particularly when driving on hills.
- Allow extra distance to accelerate, turn and slow or stop.

Basic Driving

Making Turns

The basic turning technique for Honda SXS is to drive at low speed and gradually adjust the amount of steering to suit the surface. Do not make sudden sharp turns, either off-road or on pavement.

If your vehicle ever skids sideways during a turn, steer in the direction of the skid. Also, avoid hard braking or accelerating until you have regained directional control.

Braking

The best off-road braking technique is to gently push down on the brake pedal, then increase pressure as more braking is needed. Light braking may be all you need on soft surfaces, such as sand or loose dirt. Avoid hard braking on any surface.

Your Honda SXS is equipped with an EBD. For more information about EBD, see page 72.
