Drive Chain

Removal, Cleaning & Replacement

Refer to Safety Precautions on page 84.

Your ATV has an endless (riveted master link) type chain. It should only be removed or replaced by your dealer.

The O-rings can be damaged by steam cleaning, high pressure washers, and certain solvents.

- 1. Clean the side surfaces of the chain with a dry cloth. Use a high flashpoint solvent such as kerosene not gasoline.
 - Do not brush the rubber O-rings.
 - Brushing will damage them. Use of a solvent may also damage the O-rings.
- 2. Inspect the drive chain for possible wear or damage.

Replace the drive chain if it has damaged rollers, loose fitting links, damaged O-rings, or otherwise appears unserviceable. Replacement Chain:

DID 428V - 98LE or RK428 HOZ1 - 98LE
