

**VT750CS**

When removing and installing the wheel, be careful not to damage the wheel speed sensor and pulser ring.

**Front Wheel****Removal**

1. Place your vehicle on a firm, level surface.
2. Remove the front axle bolt.

3. Loosen the right and left axle pinch bolts.

4. Support your vehicle securely and raise the front wheel off the ground using a maintenance stand or a hoist.
5. Remove the front axle shaft, front wheel and side collars.
  - Avoid getting grease, oil, or dirt on the disc or pad surfaces.
  - Do not pull the brake lever or depress the brake pedal (**VT750CS**) while the wheel is removed.
