## **Spark Plug**

## **Checking Spark Plug**

For the recommended spark plug, see "Specifications." 

▶ P. 117

Use only the recommended type of spark plug in the recommended heat range.

## NOTICE

Using a spark plug with an improper heat range can cause engine damage.

- 1. Remove the shroud. ▶ P. 52
- **2.** Disconnect the spark plug cap from the spark plug.
- **3.** Clean any dirt from around the spark plug base.
- **4.** Remove the spark plug using a suitable spark plug wrench.
- **5.** Inspect the electrodes and center porcelain for deposits, erosion or carbon fouling.

- If the erosion or deposit is heavy, replace the plug.
- Clean a carbon or wet-fouled plug with a plug cleaner, otherwise use a wire brush
- **6.** Check the spark plug gap using a wiretype feeler gauge.
  - ► If adjustment is necessary, bend the side electrode carefully.

## The gap should be:

0.031 - 0.035 in (0.80 - 0.90 mm)
