

Secondary master cylinder to rear brake caliper line:

3. Feed the brake fluid at the rear brake caliper outer bleeder valve as same procedure in step 1.
4. Repeat step 1-7 until the pedal resistance is felt.

Rear master cylinder to rear brake caliper line:

5. Feed the brake fluid at the rear brake caliper center bleeder valve as same procedure in step 1.

Next bleed the air from the system without using a brake bleeder tool.
