

TECHNICAL FEATURE

UNIT PROLINK SUSPENSION

The CBR600RR features the unit pro-link rear suspension which consists of the swingarm, shock link, shock arm, shock absorber and upper mounting bracket.

The rear suspension unit is connected to the frame at the swingarm pivot and link arm, eliminating an upper shock connection to the frame.

The upper part of rear shock absorber is mounted on the upper mounting bracket through the swingarm, therefore the whole rear shock absorber moves in response to rear wheel movement.
