<b>System Location</b>	<b>15-2</b>	<b>Starter Motor Disassembly/Assembly</b>	<b>15-5</b>
<b>Troubleshooting</b>	<b>15-3</b>		

## Service Information

**⚠ WARNING**

• **Always turn the ignition switch OFF before servicing the starter motor. The motor could suddenly start, causing serious injury.**

- A weak battery may be unable to turn the starter motor quickly enough, or supply adequate ignition current.
- If the current is kept flowing through the starter motor to turn it while the engine is not cranking over, the starter motor may be damaged.
